

## DAISEY Feature: ASQ API

What is an API? API stands for *Application Program Interface*. This API can be used to minimize duplicate entry of ASQ data for organizations who use both ASQ Online and DAISEY. When used correctly, organizations can input ASQ-3 form data into ASQ Online, and those forms will be automatically created in the DAISEY system the following day.

### How to use the ASQ API:

1. Edit a child profile in DAISEY.
2. Fill out the *Child's ASQ Online ID* question. The ID must be the same as the one in ASQ Online for this child.
3. Double check the ID is correct. **If this ID is incorrect, either no ASQ forms or the wrong child's ASQ forms may be pulled into DAISEY.**
4. *Save* these profile changes.

Note: Follow these steps only once for each child. All future ASQ forms will be pulled based on this saved ASQ Child ID.

### Keep in mind:

- The API works at the individual child level, not the organizational level. For each child that has ASQ data to transfer, that child's ASQ online ID must be saved in his or her DAISEY profile.
- This API will only transfer data for an organization if that organization is affiliated with the KU CPPR ASQ Enterprise account. If an organization uses their own account for ASQ Enterprise, the data will not be pulled into DAISEY. For more information on switching to the KU CPPR ASQ Enterprise account, please email our team at [asq-cppr@ku.edu](mailto:asq-cppr@ku.edu).

Note: To find the ASQ Online ID for each child, log into ASQ Online. Click "Child Profiles" in the top navigation bar. The ASQ Online ID is labeled as "Child ID" in the ASQ Online system (see screenshot below).

Name	Child DOB	Child ID	Alt. ID	Primary caregiver	Previous Questionn
Bobstone, Bobby	2013-04-09	1153273		Bobstone, Bethy	ASQ-3 Englis
Testinghouse, Bob	2013-05-01	1154256		Testinghouse, Robert	ASQ-3 Englis

Timeline is important: Users will not see the effects of the API until the next day after ASQ Online IDs are entered into DAISEY profiles. Very early each morning, the DAISEY ASQ API will pull ASQ data entered for those children into ASQ Online within the past 24 hours. ASQ data entered into ASQ Online before the date the ASQ Online ID was added to the DAISEY child profile will not be pulled into DAISEY by the API. Therefore, it is recommended that you enter the child's ASQ ID into the DAISEY profile as soon as that child has an ASQ Online ID.
